

Devion Wilson

Cover Letter

Hi,

My name is Dev, I am a dedicated technology professional with a drive to learn and grow. I have worked in the IT field for roughly six years focusing on mostly devops related work. I have experience working with kubernetes (hosted,GKE, and AKS), automation technologies (Jenkins, Bamboo, and Azure Devops), and configuration management such as Puppet and Chef. Outside of that experience, I am also well versed in infrastructure as code with Terraform. I feel I will be a great addition to the team as I will bring a positive attitude, great work ethic and a drive to learn and grow with the company. I look forward to hearing from you soon!
